## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 5,206,582 to Ekstedt et al. in view of U. S. Patent No. 6,484,116 to Yokoyama and U. S. Patent No. 6,633,175 to Evans et al. are references closest to the claimed invention. Ekstedt et al. in combination with Yokoyama and Evans et al. disclose a system, comprising: an input/output device of a computer system, the input/output device providing a graphical user interface (GUI); one or more test instruments for producing electrical signals; a probe card having probe needles used for measuring electronic characteristics of devices on a semiconductor wafer, each device having cells, each cell having bond pads, the bond pads being spaced apart by a multiple of a first distance and a multiple of a second distance; a matrix switch; and an interface conduit electrically connecting the one or more test instruments, the computer system, the probe card, and the matrix switch, the semiconductor wafer being configured to move so that the probe needles measure the electrical characteristics of each cell for each device selected for testing. However, Ekstedt et al. in combination with Yokoyama and Evans et al. do not teach a memory to store a predefined set of values for the first distance and for the second distance, each predefined value corresponding to a temperature and testing based on a predefined set of values for the first distance and for the second distance, each predefined value corresponding to a temperature; and including all of the other limitations in the respective independent claims.

Art Unit: 2857

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
